PROFESSIONAL SUMMARY

Full-Stack Developer across the MERN and PERN stacks, with current production experience in Angular, Flutter/Dart, and Firebase in an ed-tech environment. Owns features end to end, from schema design and REST APIs through to responsive, cross-platform UI. Uses Claude Code (CLI) daily for debugging and review.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Dart

Frontend: React.js, Next.js, Angular, Flutter, Tailwind CSS, shadcn/ui, Material UI, Redux, Zustand, Context API

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, PostgreSQL, Firebase (Firestore), Drizzle ORM

Developer Tools: Git, GitHub, Docker, Postman, Vercel, Render, Firebase Hosting

AI-Assisted Development: Claude Code (CLI) for debugging, refactoring and code review; prompt engineering for development workflows

EXPERIENCE

ThinkTac

Jul 2026 – Present

Full-Stack Engineer (Intern)

Hybrid — Bengaluru, Karnataka, India

- Build internal tools for cross-team workflows, cutting manual reporting work and speeding up day-to-day operations.
- Ship web (Angular) and mobile (Flutter, Dart) builds of the same product, keeping business logic and UI consistent across platforms.
- Work full-stack with Node.js and Firebase — API design, authentication, and real-time data — from spec through production.

VenurTechMedia

Feb 2026

Frontend Developer (Intern)

Remote — Bhubaneswar, Odisha, India

- Built frontend pages and dashboards for a management-system product for an overseas client, working from designs through to interactive views.
- Worked across React, Tailwind CSS, Material UI, and shadcn/ui in one codebase, managing dashboard state with Zustand to keep multiple views in sync.

PROJECTS

Vaani | Angular, Node.js, Express.js, TypeScript, PostgreSQL, Drizzle ORM, Sarvam AI, Firebase Auth

2026

- Real-time conversation translator for Indian languages, run entirely from one speaker's phone so the second speaker needs neither the app nor an account.
- 1-to-1 mode gives a live translated transcript that flips direction mid-conversation; multi-speaker mode auto-detects speakers and labels the transcript by speaker.

TurboForm | React, Node.js, Express.js, PostgreSQL, Drizzle ORM, TypeScript, Zod

2026

- Typeform-style form builder where creators compose dynamic forms, set field validation, choose themes, and publish a shareable link; respondents submit without an account.
- Added response analytics, an explore page for public forms, and published API documentation.

Token Mitra | React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, WebSockets

2026

- Full-stack MERN application automating clinic token queues and patient scheduling, reducing average patient wait coordination time by approximately 60%.
- Implemented role-based JWT auth with HttpOnly cookies across 15+ protected API routes for separate Patient and Doctor dashboards, plus virtual consultations over WebSockets.
